Software Developer

SUMMARY

Organized and passionate software developer with expertise in design, installation, testing and maintenance of software systems. Fluent in C#, Java, ASP.NET MVC/ Core, SQL, JavaScript and CSS Programming languages. Able to effectively self-manage during independent projects, as well as collaborate as part of a productive team.

SKILLS

Technical Skills

- **Programming:** Java including Android SDK, C, VB, ASP.Net, C#, C++, JavaScript, JQuery, PHP, Ajax, JSON, HTML, CSS and XML.
- **Databases:** SQL/ T-SQL, MS SQL, MySQL, SQLite, MongoDB, and NodeJS.
- **IDE/ Editors:** Eclipse, Android Studio, Visual Studio.

Soft Skills

- Open to challenges, improvements, and suggestions.
- Good interpersonal skills, friendly attitude, responsible, energetic, and easygoing.
- Familiarity with major office working software, MS Word, Excel, and PowerPoint.

WORK EXPERIENCE

Senior Software Developer

Ballard Power Systems, Burnaby, BC, Canada — July 2021 – September 2024

- Wrote incident reports and provided technical analysis of the incidents.
- Collaborated with cross-functional teams to assess their technology needs resulting in the successful development and execution of customized IT strategies.
- Built full-stack web apps for providing programmatic solutions to internal clients.
- Developed an automated monitoring system and leading to a 20% reduction in manual workload for the controls team.
- Collaborated with data analysts to determine their database reporting needs and develop solutions.
- Developed a web-based management system using C# ASP.NET, enabling engineers to track production system and increase efficiency by 30%.
- Excelled in debugging and troubleshooting complex issues, resulting in reduction in post-development issues and ensuring project stability.
- Management and responsible for all maintenance and support activities within SCADA systems coordinating work of internal resources to ensure performance and service availability.

Software Developer

Tero Consulting, Port Coquitlam, BC, Canada — June 2016 – June 2021

- Created technical documentation for reference and reporting.
- Provided software and technology research, analysis, and recommendations.
- Developed workflow designs and new features in Tero proprietary software, Azzier CMMS maintenance software using ASP.NET Core and C#.
- Developed an Android application, Azure Mobile, to integrate with our proprietary software.
- Responded to customers' inquiries regarding software features.
- Troubleshooting, testing and maintaining the core product software to optimize, scale, and improve existing code.

PROJECTS

AVEVA MES, Manufacturing Execution System,

SCADA System, Ballard Power Systems 2024

- Worked as a part of a team with support professionals to ensure full system maintenance.
- Built a RESTful Web API using C#.NET MVC to manipulate the MES system. It provided better management for solving problems.
- Built SQL scripts that include complex queries for large databases.
- Responded to assistance requests from engineers and directed individuals through basic troubleshooting tasks.
- **Technologies:** ASP.NET Core/ MVC, C#, Visual Basic, MS SQL, T-SQL, and Aveva MES

Ballard Bus Data

Data Ingress System, Ballard Power Systems 2021 ~ 2023

- As a project leader, I worked alongside executive leadership, project managers, control engineers, and end users to develop solutions to organizational needs.
- Developed a real-time data ingress system that download Bus data from FTP/SFTP server and convert DAT data into SQL data format. In addition, it imported approximately 50K files into SQL Local DB for Ballard, AVEVA Insight 3rd party server, and Azure Cloud Server every day.
- Maintained the Ballard Bus System in C# ASP.NET Core resulting in a remarkable 30 % reduction in processing time.
- Developed a web application to provide essential support for a controls team; therefore, it can check data loss, backfill missing data, and configure bus modules using a web application, resulting in a significant increase in overall team productivity.
- **Technologies**: C# ASP.NET MVC, VB, MS SQL, Ajax, Json, Git, Aveva, IIS and Azure.

Module Assembly Timer

C# ASP.NET MVC Project, Ballard Power Systems 2021-2022

- As a project leader, I made a project schedule and managed a project development meeting.
- Designed and developed DB schema and applications using C# .NET MVC.
- Collected all task time and analyzed the working patterns. It helped understanding what their tasks are and issues.
- Designed entity-relationship model and created test cases and test plan and performed manual testing of a web-based application.
- **Technologies:** ASP.NET Core, C#, MS SQL, T-SQL, Ajax, JSON, JavaScript, SVN, and IIS

Azzier CMMS

CMMS Software, Tero Consulting Ltd. 2016 - 2021

- Worked collaboratively with a customer service team to develop and maintain the CMMS software.
- Provided better manage, predict, and optimize clients' assets.
- Helped to boost operating efficiency with maintenance management.
- **Technologies:** ASP.NET, C#, MS SQL Server 2014, Ajax, JSON, JavaScript, SVN, WEB API, and CORS

EDUCATION

Diploma of Computer Systems Technology **2014-2016**

British Columbia Institute of Technology, Burnaby, BC, Canada

INTERESTS

- Traveling, Table tennis, Hiking, and watching films.
